

Make Your Property More Secure

Security is one of the most essential feature that tenants look for in a property. So, it is very important to make sure that the rental property is safe and secure in order to attract more people.

Install security cameras in and around your property to monitor every activity.

Add different security devices on your property such as smoke detectors, motion sensors & alarms.

Make sure that all doors and windows are efficiently hinged and have a good locking system.

Properly lighting your home, inside & out, is probably the easiest way to prevent crime on your property.

Remove or trim down large shrubs or bushes as they can act as a hiding place for burglars.

Do a background check of the tenant to uncover if they have a criminal record in the past. This is important as they might be a threat to security of other tenants.
